Thanks for the edits. They are fine with me, and I want to offer a few thoughts:

1 - I want to restore the meaning in the end of this sentence (in red) so that it is factually accurate.

These remarks echo the written recommendations ~~that the EPA and the state already gave in in March 2018 for the scenario in which contamination is found in Phase 1 testing.~~

2- Late September - Malia Cohen, President of the Board of Supervisors, expects ~~in early September~~ to schedule a hearing about the Shipyard cleanup ~~later in the month.~~

I used this wording above to avoid the misperception that she will at the end of the month set the schedule for a hearing that would occur later in the month. I agree it wasn't ideal. How about this below instead:

Late September – Tentative timing proposed by Malia Cohen, President of the Board of Supervisors, for a hearing about the Shipyard cleanup.

3 – I don't think that we need 2018. I am already worried this is too long.

This looks fine for the first report out; we may want to incorporate "who, what, when, where, why how?" as an organizing principle the next time down for readability purposes. My comments are added to Jackie's below in highlighter. I modified the bulleted list so entries were consistent with each other.

###

Mike,

At the July 31 meeting you attended with Minority Leader Pelosi, the Vice Chair of the Mayor's Hunters Point Citizens Advisory Committee (CAC) asked agencies to give updates at their monthly Environmental and Reuse Subcommittee meetings. At the August 27 monthly meeting of the CAC's, the Navy presented its plan for radiological retesting on Parcel G. Nearly 20 community members attended, representing Parcel A residents, current and former city commissions, environmental non-governmental organizations, and local businesses that live and work in the Bayview. Many asked the Navy to engage residents in more meaningful two-way dialogue that includes more technical details to restore trust, which has been seriously compromised. Many also questioned the adequacy of the Navy's Parcel G retesting workplan. They asked for greater density of sampling locations, more excavation, and rework as comprehensive as the previous Tetra Tech EC Inc. workplans. These remarks echo the written recommendations that the EPA/the state already gave in in March 2018 for the scenario in which contamination is found in Phase 1 testing. These EPA representatives attended: Christopher Hage (Senior Advisor to the Regional Administrator), Lily Lee (Remedial Project Manager), and Jackie Lane (Community Involvement Coordinator).

As next steps, the EPA has committed to participate in the following:

- Attend any monthly CAC meeting at which the has with the Shipyard cleanup on the agenda or when EPA is otherwise requested to participate.
- Angeles continues weekly meetings with San Francisco city senior managers. in the City.
- On August 28, 2018, the requested a next week During the week of September 3rd, meeting with CAC Chair Dr. Veronica Hunnicutt and Lily and we are following up to schedule that.
- On September 6, 2018, California Department of Public Health (CDPH) update to the Parcel A Home Owners Association about scanning.
- On September 8, 2018, two Navy bus tours of the Shipyard and cleanup work.
- In late September - Malia Cohen, President of the Board of Supervisors, expects in early September to schedule a hearing about the Shipyard cleanup later in the month.
- On September 24, 2018, the CAC invited the CDPH to presentation on Parcel A scanning at the CAC Environmental and Reuse Subcommittee monthly meeting at the September 24 CAC (tentative), but we have not received confirmation.
- On October 3, 2018, the Navy will host a public workshop to give a radiation update.

Please let us know any more information you may need.

- Enrique

Subject: Review - draft update for Enrique to RA re CAC mtg

Enrique asked for a draft update email for RA that expands beyond the routine weekly. Below is a draft for your review:

Mike,

At the July 31 meeting you attended with Leader Pelosi, the Vice Chair of the Mayor's Hunters Point Citizens Advisory Committee (CAC) asked agencies to give updates at their monthly meetings. At the August 27 monthly meeting of the CAC's Environmental and Reuse Subcommittee, the Navy presented its plan for radiological retesting on Parcel G. Nearly 20 community members attended, representing Parcel A residents, current and former City commissions, environmental non-governmental organizations, and local businesses that live and work in the Bayview. Many asked the Navy to engage residents in more meaningful two-way dialogue that includes more technical details to restore trust, which has been seriously compromised. Many also questioned the adequacy of the Navy's Parcel G retesting workplan. They asked for greater density of sampling locations, more excavation, and rework as comprehensive as the previous Tetra Tech EC Inc. workplans. These echo the recommendations that the EPA/State already gave in writing in March 2018 for the scenario in which contamination is found in Phase 1 testing. These EPA representatives attended: Christopher Hage (Senior Advisor to the Regional Administrator), Lily Lee (Remedial Project Manager), and Jackie Lane (Community Involvement Coordinator).

As next steps, the EPA has committed to participate in the following:

- Attend any monthly meeting at which the CAC has the Shipyard cleanup on the agenda or otherwise requests.
- On August 28, 2018, the CAC Chair Dr. Veronica Hunnicutt requested a meeting with Lily next week, and we are following up to schedule that.
- On September 6, 2018, California Department of Public Health (CDPH) update to the Parcel A Home Owners Association about scanning.
- On September 8, 2018, Navy two bus tours of the Shipyard
- Late September - Malia Cohen, President of the Board of Supervisors, expects in early September to schedule a hearing about the Shipyard cleanup later in the month.
- On September 24, 2018, the CAC invited the CDPH to present about Parcel A scanning at the September 24 CAC Environmental and Reuse Subcommittee monthly meeting, but we have not received confirmation.
- On October 3, 2018, the Navy will host a public workshop to give a radiation update.
- Angeles continues weekly meetings with San Francisco city senior managers. in the City.

Please let us know any more information you may need.
